

Acclaim SiteMinder RSA Adapter

Overview

Acclaim SiteMinder RSA Adapter provides a feature rich, flexible connector between SiteMinder Policy Server and RSA Adaptive Authentication Server.

Advantages & Opportunities

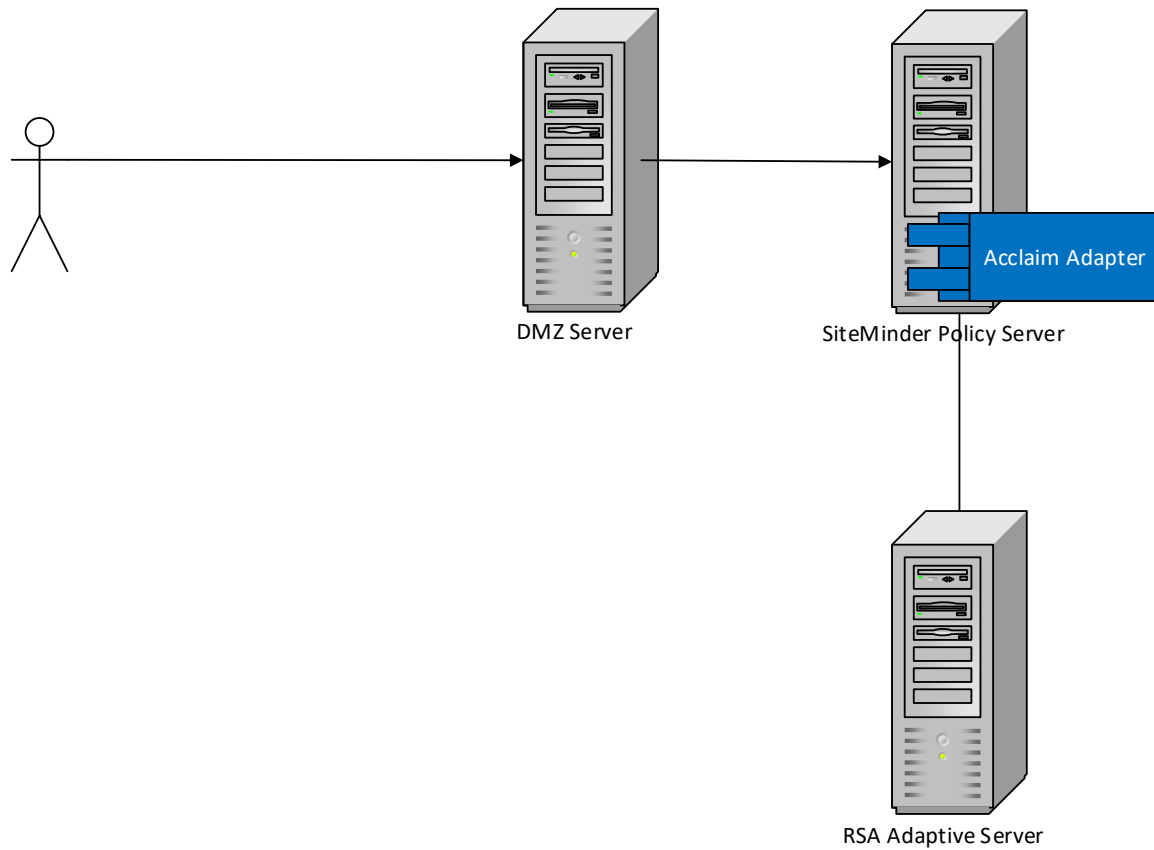

SiteMinder is perhaps the most widely used Authentication Server in the market today, while RSA Adaptive is emerging as a top contender in Behavioral Authentication sub-quadrant. However, the existing solutions between these two products provide only limited capabilities and constrain your enterprise authentication process to a few pre-defined flows.

Acclaim SiteMinder RSA Adapter provides a highly flexible, easy to use adapter between SiteMinder and RSA:

- Define your own authentication flows and behavior.
- Determine what data needs to be collected from the client; add your own as needed.
- Built with native support for SiteMinder and RSA.

In the Enterprise

Acclaim SiteMinder RSA Adapter runs within the SiteMinder Policy Server Context:
